LACK OF UNITY

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims I through 10, drawn to a <u>carbonylation process of a conjugated</u>
<u>diene</u>, classified in class 568, subclass 207+.

Group II, claims 11 through 13, drawn to a <u>catalysts</u>, classified in class 502, subclass 1+.

The inventions listed as Groups II and I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Each invention is classified within different classes and subclasses. Furthermore, it is known in the art that diene- carbonylations can be carried out with other catalysts, other than the ones describe in the instant invention, see for example:

- Arnoldy et al, US patent 5364957
- Knifton, US patent 4124617 or 4172087
 Vandersput et al, US patent 4269781.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
